## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 4, 8, and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The language "adapted to" is considered vague and indefinite.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2881

5. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Drew (061) in view of Grilletto (886) or Seidenberg (893), and Johnston (747).

Drew (061) discloses a portable MS/GC device having at least one sample gas inlet; and an evacuated mass spectrometer connected thereto. Processing means are provided to determine the identity of the sample gas. Although the mass spectrometer of Drew is not directed to analyzing contaminant gases from an article, it is assumed that the inlet of Drew could be placed over the surface of said article to test such, if desired.

The secondary references further teach that one may not only test for a particular sample gas, but one can compare such to a standard gas. For example, see claim 6 of Grilletto. As seen in the secondary reference to Seidenberg, a method is disclosed for analyzing gas samples. In using said method, one must first obtain a background gas analysis in the mass spectrometer in order to differentiate between the background gas from the sample gas.

It would have been obvious to one of ordinary skill in the art that the Drew device could further provide a more accurate sample gas analysis, if one compares said sample to a standardized gas, as taught by Grilletto. An alternative to the standardized gas of Grilletto could be said background gas, as taught by Seidenberg.

The particular gas inlet means of Drew may further be designed in a similar manner to that of the Johnston inlet, which can be placed over said article, if so desired.

***Drawings***

6. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Young has been cited to show another similar device.
